

**COBRA**  
DOWNHOLE MOTORS  
A GENCO Energy Services Company

**Delivering Downhole Performance.**

*Cobra Downhole Motors believes in doing business with honesty and integrity.  
We put our customers first with excellent products, service and support.*

*Our new, 17,000 square foot manufacturing and service facility is located in Houston, Texas.*

## **About Cobra Downhole Motors**

Cobra Downhole Motors combines new material technology and innovative product features with a customer driven approach. We add value to our customers' drilling programs by giving them "fit for purpose" motor designs and providing robust reliability. We work closely with our customers to understand their specific needs.

Our new 17,000 square foot manufacturing and service facility allows us to be more responsive to our customers' needs, while maintaining ISO quality standards and sufficient inventories. Our service and maintenance personnel are some of the most experienced professionals in the industry and are supported by a senior staff with over 50 years of experience in downhole motors.

Cobra Downhole Motors manufactures all bearing assemblies, driveshafts, and adjustable housings to the highest standards of quality. We test and re-test

all of our components so that you can be assured of the most durable and highest-performing motors in the industry.

Cobra Downhole Motors assigns and maintains serial numbers for every major component it builds. Traceability is documented and maintained at every step in the manufacturing and service process in our specialized inventory-tracking software program, from the material certifications of the raw materials used, through machining, assembly and delivery, hours in operation, refurbishment records and even its anticipated length of service. Before we deliver a motor, every part is thoroughly inspected to ensure that it meets our precise specifications. The complete record of the part is available for customer review.

In addition, we can provide rental, lease to purchase or purchase options with qualified training and 24/7 technical support.

## Cobra Motors

Cobra offers a complete line of downhole mud motors from 1-11/16" OD to 11-1/4" OD which are designed to provide maximum performance, resulting in reduced drilling time which leads to cost savings for any application. Engineered for durability and longevity, Cobra drilling motors are designed and manufactured to the most stringent, specific tolerances and are made of the highest quality materials.

The Cobra downhole motor is designed with the latest technology, utilizing "clean sheet" engineering. No legacy product lines or antiquated technology is used. Our customers and their specific applications dictate our motor designs.

## Power Sections and Flex-Coupling Transmissions

Our field-proven power section designs provide the optimal combination of speed and torque delivered directly to the bit which produces unsurpassed performance. Cobra has the right power section to meet the most demanding environments. Speed and torque delivered from the power section is transferred via a high strength flex-coupling transmission for maximum torque output and reliability. This is the highest rated transmission on the market.

For more information on Cobra Downhole Motors' revolutionary "fit for purpose" motor designs, please call us at 281 587-0005 or visit our web site at [www.cobradownhole.com](http://www.cobradownhole.com). We look forward to providing you with the most reliable and cost-effective motors in the industry.

***Cobra Downhole Motors has an extensive line of drilling motors designed for specific applications, including:***

- Directional Drilling
- Horizontal Drilling
- Performance Drilling
- Coiled Tubing/Workover
- Coal Bed Methane Drilling
- HDD/River Crossing
- Geothermal Drilling
